

Date: 18th January 2024

Presented to: **Claudio Jose Vitaliano**

**Dear Claudio,**

Thank you for your recent enquiry.

## **Quick Proposal for Tattoos Selling App**

### **Brief**

The scope of this project document includes an app, where clients want to sell tattoos and take appointment for the same. As a solution to the problem we will be providing an app, where end user will be able to see a list of tattoos, select one of their desired tattoos and book an appointment.

### **Scope of Work**

#### **1. Application flow for user -**

##### ➤ **Splash Screen**

- Launch screen of the application which will have the business logo and name.

##### ➤ **Sign Up**

- Users will be able to sign up on the platform, Users will have to enter the below details on the app.

- **User Name**

User will have to enter the user first and last name on the platform.

- **Email address**

The User will get the option to sign up on the platform using their Email Address.

- **OTP Verification**

Once they Enter the E-mail Address, they will receive the OTP to verify the Email account.

- **Password**

Once the User adds their email address on the platform the, Users will be able to create the password for their account, the User can create the password in Characters, Special characters, Upper case, Lower case, Numbers on the platform.

➤ **Login**

- Users will be able to login on the platform using their login credentials that they have used at the signup on the app.
  - **User ID**
  - **Password**

➤ **Forgot Password**

- When Users click on the reset option they will get a code on the registered Email ID, after that they will be able to create a new password.

➤ **Home Page**

- Users will be able to view the below options on the homepage menu -
  - **View Tattoos & Services**
  - **Checkout & Online Payment**
