

## Feedback on the functionality of the app

### Spending money page

- You shouldn't be able to move forward without having filled in spending money
- The popup should not appear before the user has time to see what it says on the page

After personal information, spending money, and goals, there should appear a pop-up explaining how the app itself works. ( You'll get a daily budget that shows how much you spend each day. The basic daily budget is based on the amount you entered in the spending money question.

### Home page

- Round the sum to a whole krona, e.g. 234.55 is rounded to 235 kr
- The gold coin in the middle should be interactive so that users can see at all times how much they spent (now the spent and budget are not linked to each other)
- It is the numbers in the Gold Coin that should be red if you have spent over budget
- Spend should reflect money in, i.e. there should be white numbers there as well
- If you have money in, it should not affect the budget backwards, but only forwards
- Popup when you have put in money in. (Chathing!! ✨✨)

### Categories

- Missing categories: Children
- We'd love to include one more category: everyday luxury
- You should be able to add a category without having to add an image
- You should be able to delete the change category and amount that you have entered
- It should be larger images that are the same size
- Subcategories - we can add standing subcategories for users
- Popup - "You can add subcategories that fit your lifestyle"
- Fill your total and category at the same time. It's not user-friendly right now, as this has to be done in two steps.

### Goal/Dreams

- It should be an intro headline (example: my dreams)
- Popup Example: What Do You Dream Of? Fill in what you dream of and how much money you need to fulfill the dream. You can always fill in more dreams. You can also change freely and add under settings
- Pop up - When you are about a third of the way to the goal, a pop-up will appear that motivates you to continue reaching the goal- Example: You have come a long way towards your dream. Good job!
- Pop up - When you are about two-thirds of the way to the goal, a pop-up will appear that motivates you to continue reaching the goal. - Example: You are getting closer to your dreams. Soon you'll be there. You're amazing!

- Pop up - When you have achieved the goal. - Example: Congratulations! You did it! (Lots of confetti.)

### **Settings**

- It is not possible to make changes to spending money or personal information in settings.

### **Marketing - Articles, statistics and Save like a pro**

- Pop up promoting the option to buy the paid version.

### **Extra pop ups**

- Own pop up - We would like to be able to add our own pop ups if needed.
