Shabidh (Manager- Business Development)

Akanksha (Business Development Executive)

### **Agenda: -**

Mobile Application for Catering and Website upgradation

### **Client Requirements –**

1. It's a simple mobile app that consists of ordering sandwiches online. Development of a user-friendly mobile application focused on facilitating online sandwich or meal orders.
2. Implementation of a website upgrade featuring advanced functionalities to optimize the order placement process, in response to the increasing demand for seamless online transactions.
3. Incorporation of a secure online payment system, ensuring a swift and secure transaction process, allowing customers to complete payments seamlessly.
4. Comprehensive improvement of our online platform, creating a modern and cohesive ordering system that aligns with current trends and caters to customer preferences in the digital age.

**(Note – Kindly go through the MOM and assist if any further changes required).**
