Dear Chinwendu
Thank you for your recent enquiry, our quote is as follows:

Car Training Application

Overview: - The project comprises an application where users can learn to drive via reading courses and taking part in the test for the same. The Scores that the users get will showcase how much they know about driving and skills. Users can check the progress bar. Users have to qualify for the driving test via training or theory tests held by FRSC. Users will be granted driver's licenses based on their performance and skills.

Features of Application:

The entire project is divided into 2 phases. Each phase contains several sections and functionalities. The costing and estimation is also divided based on 2 phases.

Phase 1

- **Signup:-**

  - The User will be able to sign up on the application by using their:
    - User Name
    - Mobile No
    - Password
    - Confirm Password
    - Profile Pic

- **Login:-**

  - The User will be able to log in on the app using the login credentials that they have created during the sign-up process.
  - The User can use the following credentials such as:
    - Mobile Number
    - OTP

- **Home Screen:-**

  - The user will land on the home screen once logged in successfully.
  - Users can select following options while browsing the home screen:-
    - My Account

- o Test
- o My Progress
- o Courses- Chapters
- o My Performance – Progress Graph, Skills and Test Results
- o Left Menu Bar – My Courses

- **My Account:-**

  - User can view following on the profile section:-
    - o Account Details
    - o Delete Account
  - Users can manage the account details here which will consist of :-
    - o Profile details
    - o Change password
    - o Profile Pic.

- **Test:-**

  - Users can participate on the tests and check their skills.
  - The tests will be based on test pattern, where 4 options will be given and only one will be the correct answer
  - Tests will analyse and tell you on which skills users lack and need to read the courses.
  - Users can view the results of the test given. It will showcase the results on scoreboard what the users achieved
  - After finishing the recent test, user can check the progress and results on my results menu

- **My Progress:-**

  - Users can also view progress on the basis of graphical structure.
  - Can view results on last completed test.
  - Users can view the results based on total tests given too.

- **Courses:-**

    - Users can find different courses on driving via search bar

    - Every course will have different chapters

    - User can click on start button to open the initial chapter

    - Can click on Previous/Next Page to change the chapters

    - Can click on back button to come back at the main menu

    - As per the course knowledge user can also participate on tests to check their skills

    - Users can view several videos which are based on car driving lessons

    - Users will find several videos for the same and can click to play the video.

- **My Performance:-**

    - My performance will showcase users whole progress based on tests, performance and skills

- **Left Menu Bar:-**

    The Menu Bar will consist of following sections:-

    - **My Courses:-**
        - Users can view the courses they are reading currently.
        - They can resume the chapters while clicking on the course.

Phase 2

- **Apply FRSC Form:-** <mark>(Client to provide API for FRSC Portal/Website)</mark>
    - The FRSC Form will be available when users have completed their courses and tests
    - The FRSC Form will ask the user to enter their personal details and let the choose either one of the options to receive driver license:-
        - **Driver Training** - Under which user will be judged on the basis of driving skills and will be guided for the same.
        - **Driving School**- Under which user will be enrolled in a driving school where they will be guided on several topics and driving.
- **Manual Process:-**
    - The FRSC will conduct two tests which grants driver license based on qualifying any tests.
    - The 2 Tests which will be available are as follows:-
        - **FRSC Test on practical**- A practical driving test via user will be performed where based on driving skills user will be judged. The results will be shown on My results page which can be either pass/fail along with full details.
        - **FRSC Test on Q/A Theory**- A theory Test will be held where user will be asked several questions based on driving. The Results will be shown on My Results section which can be either pass/fail along with full details.
- **My FRSC Results:-**

    - Under My Results users can view the test results based on the choice they selected.
    - The results will contain full details along with pass or fail status.
    - If the user status shows pass they will be eligible for driver license, but if the user status shows fail they have to give the test again to qualify for driver license.

- **Video Translation**
    - Users can convert the translation or change the language for the video tutorials
    - Users can also view captions under the video if needed to view (Optional)

- **Change Language**
    - User can change language from single to any other languages.
    - Application language will be set up on the basis if the language selection.

- **Help :-**

    - **FAQ's :-**
        - Users can view FAQ's and seek help if found any queries.
        - FAQ's will have Q&A for all the queries.

    - **Privacy policy**
        - Users will be able to view privacy policy of the application

    - **Terms and Conditions**
        - Users will be able to view terms and conditions of the application.

Features of Admin Panel

- **Users Management:-**

  o Admin will be able to view/search the list of all users of the application.

  o Admin will be able to activate or deactivate the account of the users.

- **Course Management:-**

  o Admin will be able to add/delete courses of driving

  o Admin will be able to add/edit/delete chapters of driving

  o Admin will be able to list any chapters under the particular courses.

  o Admin will be able to remove already listed chapters from any courses

- **Notification Management:-**

  o Admin will be able to push the notifications to the end users.

  o The notification can contain driving notifications, course notification, etc.

- **Test management:-**

  o Admin will be able to manage the questions for the test.

  o Admin will be able to manage answers for the test.

  o Admin will be able to showcase results on the basis of test on the scoreboard.

- **Report management:-**

  o Admin will be able to manage all the reports

  o Reports can be related to users, courses, tests.

- **Video management:- To be discussed**

  o Admin will be able to upload videos from backend and manage the same

  o Videos can be uploaded on different languages

- **Content Management:** -

  o Section that would be used the client to manage the below sections of the website:-

    ▪ About Us

    ▪ Our Service

    ▪ Terms and Conditions

    ▪ Privacy Policies

    ▪ Social media

Assumptions:-

- The API for FRSC will be provided by client

- Any related reference doc or website of FRSC will be shared by client

- Other languages details other than English will be shared by client to integrate in the application

Implementation:

- Design and development of the Application (Only Android)

- Development of the Admin Panel

- Testing and debugging of the Mobile Application and Admin Panel.

- All 3rd Party API will be shared via client.

Total Business Days for the Project:	90 Business Days
Estimated Timeline For Phase 1	45 Business Days
Estimated Cost for Phase 1:	9,000 USD
Estimated Timeline For Phase 2	45 (Excluding Video translation in different Language)
Estimated Cost for Phase 2:	9,000 USD

Proposed Quote Include:

- Design and Development of Android Application.
- Design and Development of web-based admin end.
- Complete QA and Testing of Mobile application and admin panel
- Features and functions will be implemented exactly as mentioned in the proposed scope.
- The application will strictly follow the standard guidelines of Google Play Store.
- WebMobril will be responsible for complete development and deployment on the Google Play Store.
- The app will be purchased from the Google Play Store.
